HOW THINGS WORK EXPLORED AT AUGUST 9 SMUG MEETING

“What is a router and how does it do its job?” will be one of the questions answered when the Sierra Macintosh Users Group (SMUG) holds its August 9 meeting that will begin at 7 p.m. in the assembly room of the Ebbetts Pass Fire District, 1037 Blagen Rd., just off Highway 4.

Brian Thomas, Director of Innovation for the Tuolumne County Superintendent of Schools, will solve the mysteries behind a variety of Apple computer elements including Bluetooth, Wi-Fi, external hard drives, Time Machine, and Keychain. He will also explain the similarity between a telephone and a microwave oven.

SMUG members who have been to a Thomas presentation know he will not only address the questions asked, he will also provide a variety of tips and educational and entertaining information. There are always surprises.

All questions about any Apple product or application will be welcomed.

SMUG meets the second Tuesday of each month. Meetings are open to everyone and there is no charge to attend. The organization exists to keep Mac users abreast of the latest developments and to address the nagging questions that arise from time to time. Its goal is to take the mystery out of computers and to enable members to take advantage of all the features their Macs and other Apple products possess.

SMUG was founded in 1995 and is a non-profit organization run completely by volunteers. Dues are \$15 per year. For more information visit the SMUG website at www.SierraMacintoshUsersGroup.org or call 795-3798 or 728-9012.
